Active TS/SCI FSP Clearance

Professional Summary

TS/SCI-cleared full-stack engineer building secure systems for DoD Intelligence Community targeting platforms. Specializes in Java/Spring Boot REST APIs, Angular 21+, and DevSecOps delivery across classified and unclassified environments.

Employment

Modus Operandi, Norfolk, VA / Hybrid

Full-stack Software Engineer — June 2025 to Present

- Sole backend engineer made responsible for design through production of module overhaul supporting dynamic citation management, classification roll-up logic, and fine-grained access controls in Sprint Boot REST APIs and Angular, on a 5-person team, sustaining delivery across 14 sprints in an agile release cycle.
- Projected 90%+ reduction in analyst source-citation review time (weeks to hours) ahead of production rollout, based on internal testing and stakeholder walkthroughs against the legacy manual process.
- Responsible for secure, portable delivery of 8 containerized services across 4 classified and unclassified environments by applying DevSecOps practices to CI/CD pipelines.
- Leading the frontend migration of a mission-critical targeting application from React to Angular, rebuilding 20+ core analyst-facing views to consolidate code bases and reduce technical debt.

GDIT & GCI, inc., Chantilly, VA

Software Engineer Intern — May 2023 - Aug 2023 | May 2024 - Aug 2024

- Built an autoscaling, automated container-scanning pipeline using AWS, Terraform, Kubernetes, Docker, and Python.
- Authored technical documentation and presented the prototype to stakeholders.
- Created an automated internal onboarding tool to replace manual email workflows.
- Sustained consistent weekly reporting for a 5-intern cohort by consolidating status updates and acting as primary liaison to the program director.

Skills & Certifications

Core (Production experience): Java, Spring Boot, REST APIs, TypeScript, Angular, Docker, Kubernetes, OAuth, CI/CD

Additional / working knowledge: Python, C++, React, AWS, AWS GovCloud, PostgreSQL, MySQL, RDF4J, Terraform

Methodologies: Agile, TDD, DevSecOps, Microservices

Certifications : *CompTIA* **Security+ CE**

Education

Christopher Newport University, Newport News, VA

B.S., Computer Science (Major), Information Science (Minor) — May 2025 - GPA: 3.95
